

Smarter Path to Stronger Cleaning Programs

Achieve Assistant™ is a powerful workloading and ROI solution that helps facility managers optimize staffing levels, tasks and cleaning budgets. The result: better program outcomes at lower overall cost.

Better Information, Better Results

Our trained industry consultants utilize Achieve Assistant to analyze key task and cost variables, allowing you to test management decisions before you make them. Incorporating updated ISSA 540 Cleaning Times, Achieve Assistant creates your ideal facility maintenance plan quickly and easily:

- Establishes time required to complete a task or clean an area
- Assesses budget impact of adding or subtracting space
- Previews effects of a wage increase on overall cleaning budgets
- Determines how adjusting task frequency will affect costs
- Charts productivity gains using different equipment options

Achieve Assistant calculates cleaning times and costs using industry accepted production rates, or customized rates based on your unique needs and circumstances.

Either way, what once took hours, can now be completed in minutes!

Achieve Assistant™ Simple, Fast, Flexible.

Easy-to-read charts capture and communicate critical program information.

Now, get the answers you need to optimize your cleaning program—all backed by accurate data and industry best practices. Using Achieve Assistant, your Triple-S sales consultant will develop “What-if” scenarios to help you plan and implement your cleaning program with new confidence and efficiency.

Solutions on Display

Supported by a user-friendly tab-based interface, Achieve Assistant features highly readable charts and graphs that convey key program information at a glance. A complete FTE summary area displays required staffing levels by day and task.

Focus on Productivity

Achieve Assistant’s return-on-investment (ROI) capabilities can generate a full cost/benefit analysis for each equipment purchase decision. Using your existing equipment and tasks as a baseline, Achieve Assistant calculates labor savings, payback period, and total lifecycle ROI for each of two possible equipment options.

A Complete Solution

Achieve Assistant includes everything needed to put your facility on the path to a better, more cost-effective cleaning program:

- Zone and Specialist workload modules
- Equipment ROI module
- Worksheets for collecting facility data
- Complete help file and user guide

Quickly generate ROI data to justify and guide equipment purchase decisions.

Achieve Assistant Cleaning Management Software is compliant with ISSA's CIMS/ CIMS-GB standard.

Contact your Triple S sales consultant to learn more about how the Achieve Assistant Solution can help you improve program results while lowering your total cost of cleaning.
